

CONSENT FORM

THE NEXT GENERATION OF TEACHING: BRIDGING THE GAP USING VIRTUAL REALITY

Researcher: Ken Kencevski

I have been given information about research by Ken Kencevski who is conducting this research.

I understand that if I consent my child to participate in this project he/she will be asked to fill in five questionnaires (three before and two after the learning experience in Virtual Reality, each taking approximately 5 minutes to complete). The information your child provide will be used for the purpose of research and evaluating his/her learning with the Virtual Reality environment.

The content related questionnaire is consisted of seven questions, asking students about their general knowledge about Antarctic, penguins and climate change. The learning preference inventory is consisted of twelve questions which help researcher to investigate students' learning style preference. The pre-training questionnaire has three sections, one which measures his/her experience with games, one assessing his/her characteristics in general, and finally a section assessing how he/she feel at the moment. The post training questionnaire also has three sections (how he/she feel at the moment? What did he/she experience? plus conclusion and comments) and the content related questionnaire will be repeated.

I understand that my child's contribution will be confidential and that there will be no personal identification in the questionnaires.

I have been advised there are no risks and burdens associated with this research and that I will have an opportunity to ask Ken Kencevski any questions that I may have about this research and my child's participation in it.

I understand that: (1) my child's participation in this research is voluntary, (2) My child is free to refuse to participate in this research and (3) My child is free to withdraw from the research at any time. My child's refusal to participate or his/her withdrawal of consent will not affect his/her treatment in any way.

I understand that the identified data collected from my child will be used for research and possible journal publications, etc, and I consent for it to be used in this fashion.
